

SYSTEM PROTOCOL 02

Building with Integrity

Establishing a foundation of trust through radical transparency and user-centric decision making.

Clear pricing

HIGH TRUST

No hidden fees or surprise charges at checkout. We display the final cost, including taxes and shipping, from the very first step of the journey.

- ✓ Immediate subtotal visibility
- ✓ Explicit subscription terms

Honest communication

Speak to users like partners, not targets. Avoid manipulative copy, false urgency, and technical jargon that hides intent.

Ethical Messaging

Transparent privacy policies

Replace 50-page legal documents with human-readable summaries. Let users know exactly what data is collected and why, with clear opt-out controls.

GDPR+ DATA SOVEREIGNTY

Easy navigation

Design with the user's intent in mind. Logical flows that don't trap users in "roach motels" or forced loops. If they want to leave, let them.
